

Announcement of a Mail Facility at UCSB

RFC #574
NIC #19144Mark Krilanovich
UCSB
Sept 26, 1973

Announcement of a Mail Facility at UCSB

There now exists a server program at UCSB, resident under socket 3, which supports that subset of the File Transfer Protocol necessary for mail delivery. Only the MAIL and BYE commands are implemented at this time.

Mail may be sent to an individual at UCSB by specifying his local user name in the MAIL command. The following is a list of those individuals currently defined as valid recipients of Network mail, each with their respective user name: Ed Faeh (FAEH), Jim Guyton (GUYTON), Mark Krilanovich (KRILANOV), Curtis Mosso (MOSSO), John Pickens (PICKENS), and Ron Stoughton (STOUGHTN). In addition, any general comments or complaints about UCSB services may be sent to user name GRIPE.
